National programmes linked to information prescriptions

2. NICE Guidance

Here are some examples where NICE Guidance includes sections on improving patient information and introducing information prescriptions.

[Nice Supportive & Palliative Care guidance – March 2004](#)

Chapter 4 - is devoted to patient information

[NICE Improving Outcomes Guidance - Children & Young people with Cancer – August 2004](#)

In Section E on Page 119 there is a good section on patient information.

[NICE have produced a range of commissioning guides.](#) Each guide comprises a series of text-based web pages that signpost and provide topic-specific information on key clinical and service-related issues to consider during the commissioning process as well as an interactive commissioning tool.
